Flood Detector

Protect your property from water damage! The flood detector is designed to sense the presence of water in basements, yachts and many others residential and commercial applications, providing early warning of developing floods. The flood detector is designed so that the transceiver is mounted on the wall and the flood sensor is placed in a location where leakage or flooding is probable. Its great compatibility with the U-Net product family makes it suitable for smart home cloud based platforms.

Main Features

- IP44 protection
- Special water sensor
- Wireless two-way communication
- Beep sound and LED indication
- Flood sensor cable length up to 3m
- Auto-pairing to the gateway
- Reports status to the gateway every hour

Smarter, Safer, Greener

Brief Product Specifications

Operating Frequency	868 MHz		Operation temperature	-10 - 40°c
RF range (open space)	>200m		Operating humidity	85% RH max
RF protocol	U-Net 3.0		Dimension (mm)	84.96(L) x 39(D) x 84.96(H)
User interface	1 x Link, 1 x LED, 1 x Buzzer		Weight	134g, including batteries
Battery type	1.5V alkaline AA x 3
